

# 2025 PIT COUNT

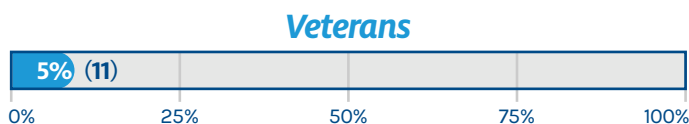

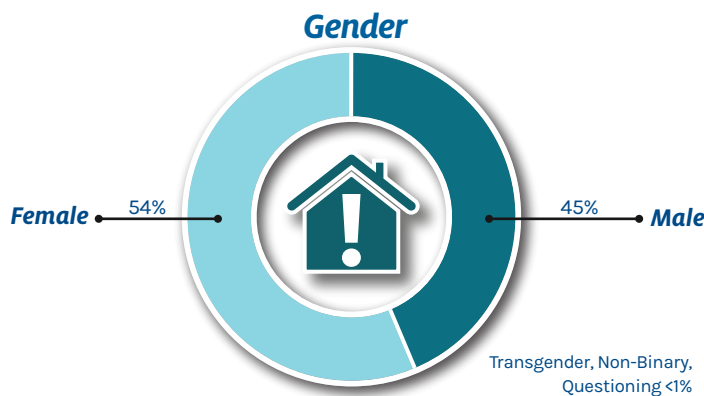

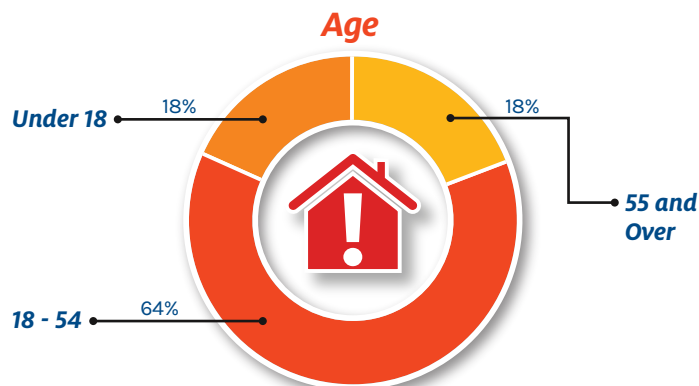

POINT-IN-TIME HOMELESSNESS COUNT

REGION 1

246

The Point-in-Time (PIT) count takes a snapshot of the number of those experiencing homelessness in sheltered and unsheltered environments. This annual count occurs on one night in January and can fluctuate from year to year based on several factors, including count locations, weather, and the number of volunteers surveying. Data gathered from the PIT count is best used to identify trends over time.

## Characteristics of Homelessness

### Household Types

## LIVING SITUATION

101

Sheltered

59  
Transitional Housing

42  
Emergency Shelter

145

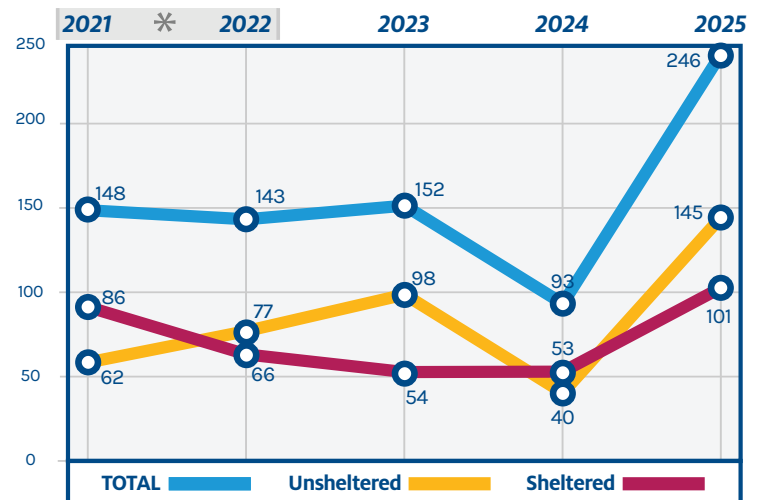

Unsheltered

72  
Vehicles

15  
Non-Housing

58  
Outside

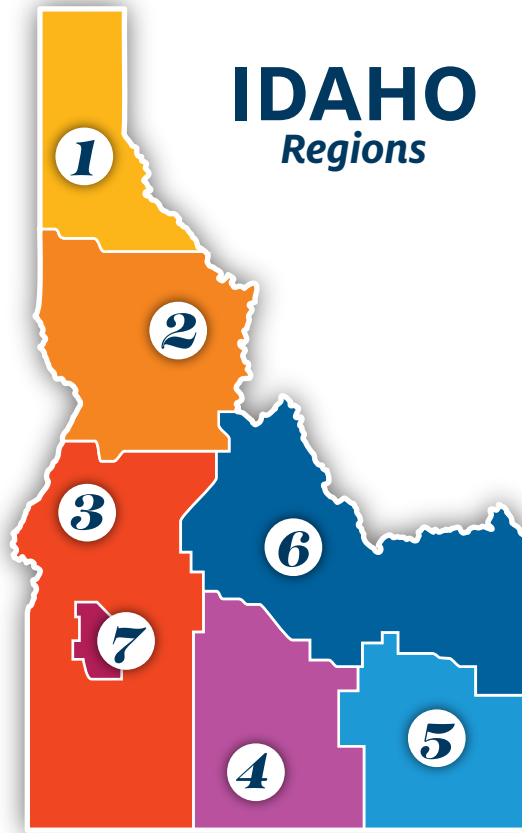

## 5-Year Trend

\* Due to the Covid-19 pandemic there are parts of the state where the count was not performed or was limited in scope.

Idaho's 21st annual Point-in-Time (PIT) count was conducted the night of January 29, 2025. The PIT counts for regions 1-6 (all counties except Ada) were conducted by Balance of State Continuum of Care (CoC) and coordinated by Idaho Housing and Finance Association (IHFA). The PIT count for region 7 was conducted by Boise City/Ada County CoC, Our Path Home, and coordinated by the City of Boise. HUD's definition of homelessness for the PIT count does not include persons who may be staying with friends or relatives, in a hotel/motel, in a treatment facility, in jail or permanent housing projects for formerly homeless persons. To learn more about how PIT information is collected, visit [idahohousing.com/hmis/](https://idahohousing.com/hmis/).

# TOTAL HOMELESS BY REGION

## POINT-IN-TIME COUNT

- ▶ While the Point-in-Time count represents a one-day snapshot of homelessness in the state and its regions, it is not indicative of the true number of homeless persons and families in the state over a given year.
- ▶ There is variation in count methodology year-to-year within communities. Unsheltered counts have more limitations than sheltered counts.
- ▶ Despite these limitations, the annual Point-in-Time count is a snapshot of those experiencing homelessness in the state and is used to identify trends over time.
