POINT-IN-TIME COUNT

- ▶ While the Point-in-Time count represents a one-day snapshot of homelessness in the state and its regions, it is not indicative of the true number of homeless persons and families in the state over a given year.
- ▶ There is variation in count methodology year-to-year within communities. Unsheltered counts have more limitations than sheltered counts.
- ▶ Despite these limitations, the annual Point-in-Time count is a snapshot of those experiencing homelessness in the state and is used to inform decisions on resource allocation.

Idaho's 18th annual Point-in-Time (PIT) count was conducted the night of January 27, 2021. The PIT counts for regions 1-6 were conducted by Balance of State Continuum of Care (CoC) and coordinated by Idaho Housing and Finance Association (IHFA). The PIT count for region 7 was conducted and coordinated by Boise City Ada County CoC. The primary goal of the PIT count is to provide a one-night "snapshot" of the number of homeless persons who are either living on the streets, in places not meant for habitation or are currently residing in emergency shelters or homeless transitional housing projects. HUD's definition of homelessness for the PIT count does not include persons who may be staying with friends or relatives, in a hotel/motel, in a treatment facility, in jail or permanent housing projects for formerly homeless persons.
